

59m left

1. Print the number of matching valid pairs of braces

Write a function to return the total number of valid pairs of curly-braces

ALL

A valid pair of braces is an opening brace and a corresponding closing brace (with or without characters in-between).

For e.g. the below has 2 valid pairs of braces

```
{
int i=0;
    {
        system.out.println("hi");
    }
}
```

1**2**

The below has only 1 valid pair

3

```
}/*this is a closing brace*/
int i=0;
    {
        system.out.println("hi");
    }
{/*this is an opening brace*/
```
