2. Print frequency of strings

**ALL**

Create a function which prints the frequency of every string in the given list of string. Empty lines should be skipped. Print the frequency in a sorted manner.

For e.g., for the array

dogs
cats
horses
bee
cats
dogs
cat
ant
bee

1**2****3**

The output should be

ant 1
bee 2
cat 1
cats 2
dogs 2
horses 1

Language

Java 8
